

They may be your best friends but do your guests and visitors think so?

Most pet owners are aware of the odour problems created by animals in the home. Even litter trays can cause embarrassment with odours from older and incontinent pets the problems can be much worse. Pet odours are created by bacteria in the air and on surfaces including animals fur.

AIRsteril[®]

Control pet odours with Air Steril and improve your whole household environment and your wellbeing

- ✓ Freshen rooms
- ✓ Eliminate pet odours
- ✓ No filters, no chemicals
- ✓ Control infection in your home
- ✓ Continuous low energy 24/7 operation
- ✓ Completely silent options - no fan, no motor
- ✓ Fan powered units for larger areas

As houses have become less drafty, indoor air pollution has grown to be much greater than outdoor air pollution. Odours and airborne infections are created by bacteria, viruses, mould, fungi and nasty pathogens called volatile organic compounds (VOCs) found in the air and on surfaces throughout the home.

"Apart from removing the odour problem, these machine really do kill the bacteria that produce the odour at source I have been really pleased with the Results" Mr J Abbott

The product range has been specially developed to fit a wide range of applications from small Bedrooms and Kitchens to larger Lounge areas or complete home solutions. All units use technology proven to improve the quality of air, eliminating odours by targeting bacteria, viruses, mould and fungi in the air and on surfaces.
